

Radius Design System & MIU

Color // Iconography

July 2019

From infancy onward, persons encounter both explicit and subtle pairings between colors and particular messages, concepts, and experiences in particular situations. With repetition, these pairings are posited to produce strong color associations, such that the mere perception of a color in a particular situation activates its paired associate and influences affect, cognition, and behavior accordingly.

WHY START WITH COLOR?

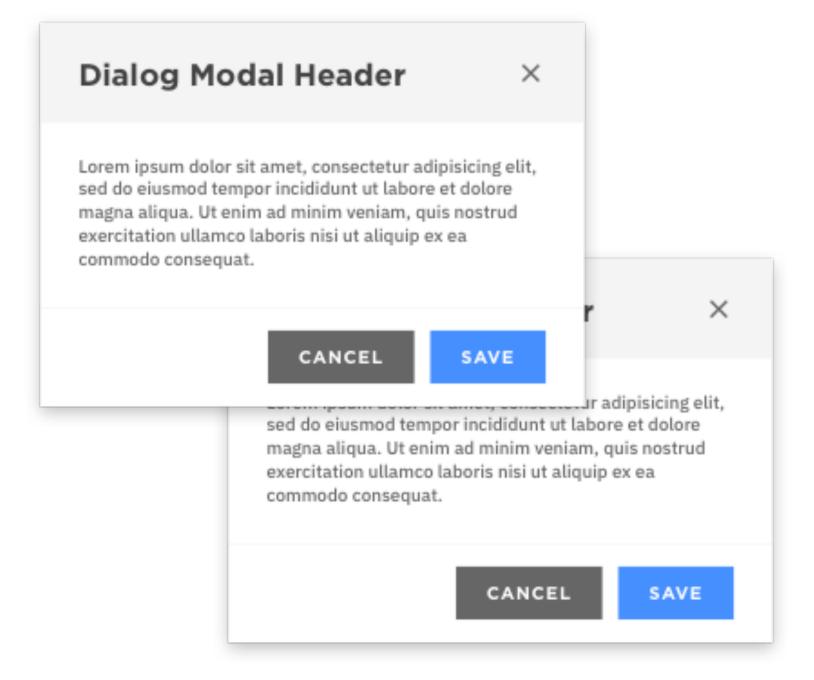

Colors play a very important role in a Design System. There is a main color for each Brand/Product. Support colors are meant to complement the user interface and are used across all products at RMS.

- Quick Win
- Alignment RMS brand
- Easy Implementation

BRAND COLOR — RMS BLUE

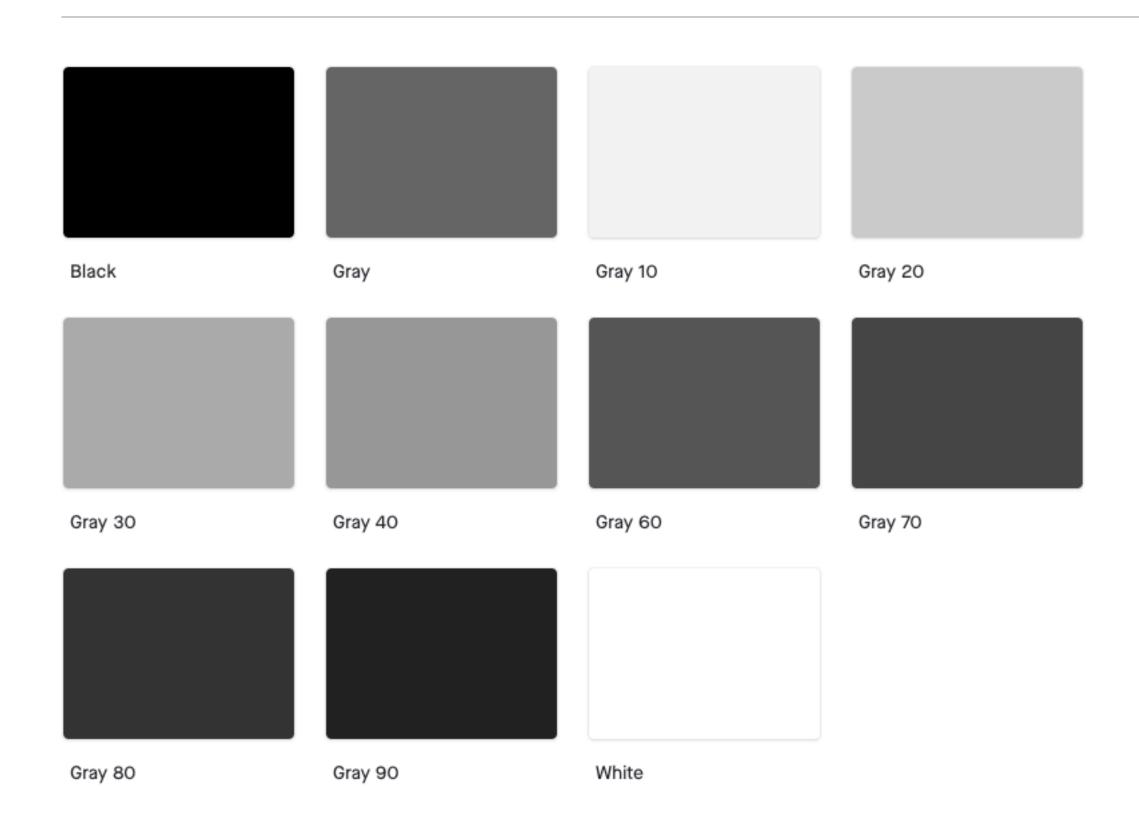

The primary color style for all products.

GRAYSCALE

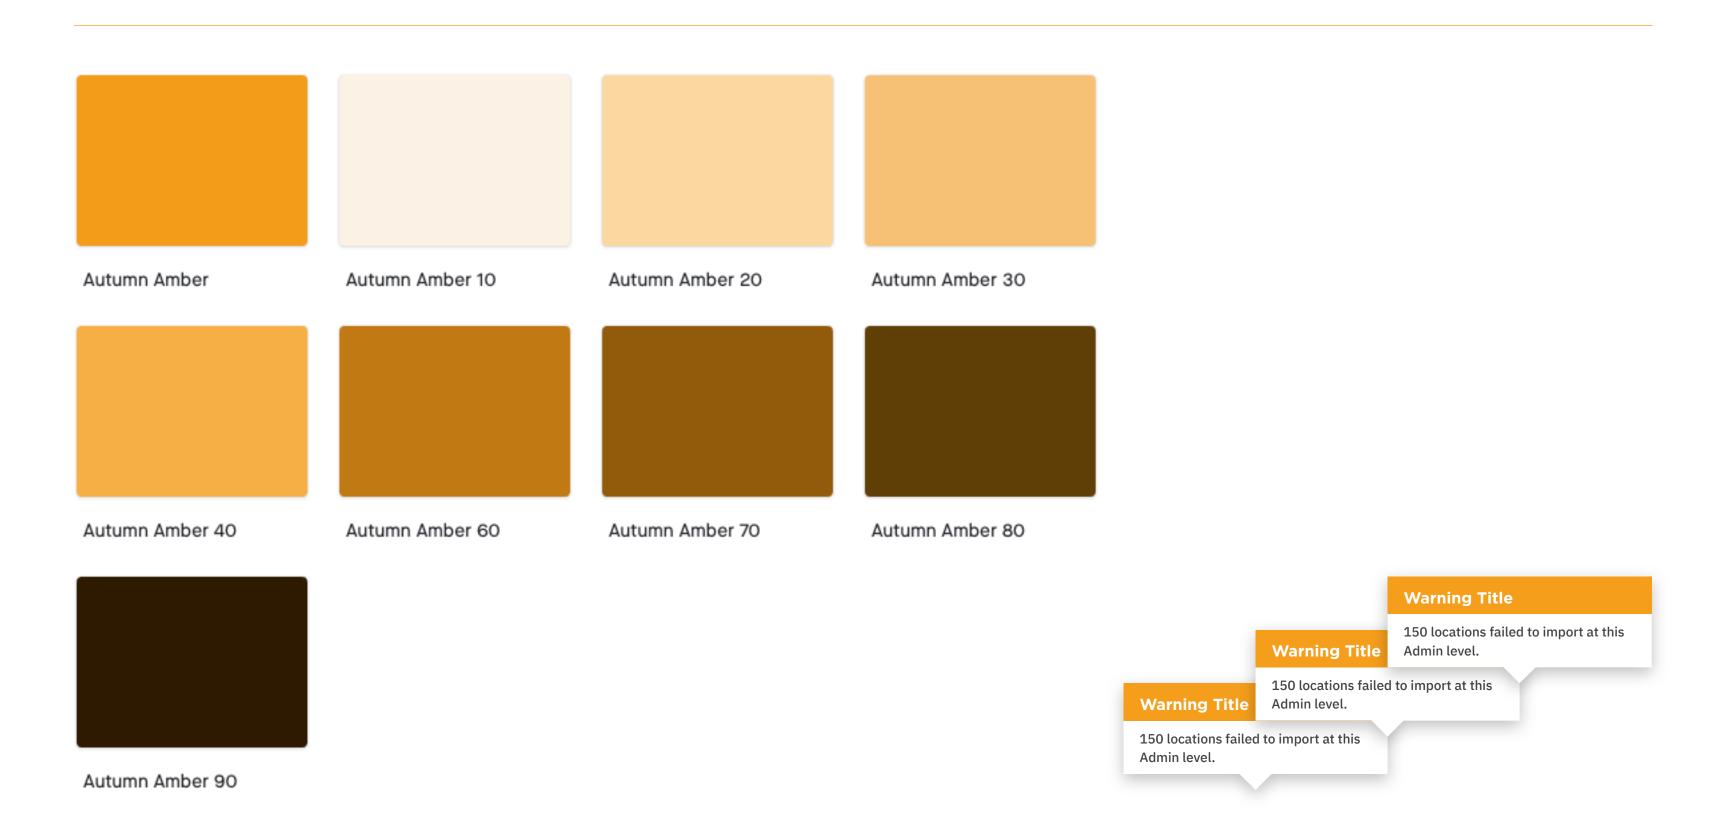

Grayscale Colors are mainly used for text, backgrounds and disabled states

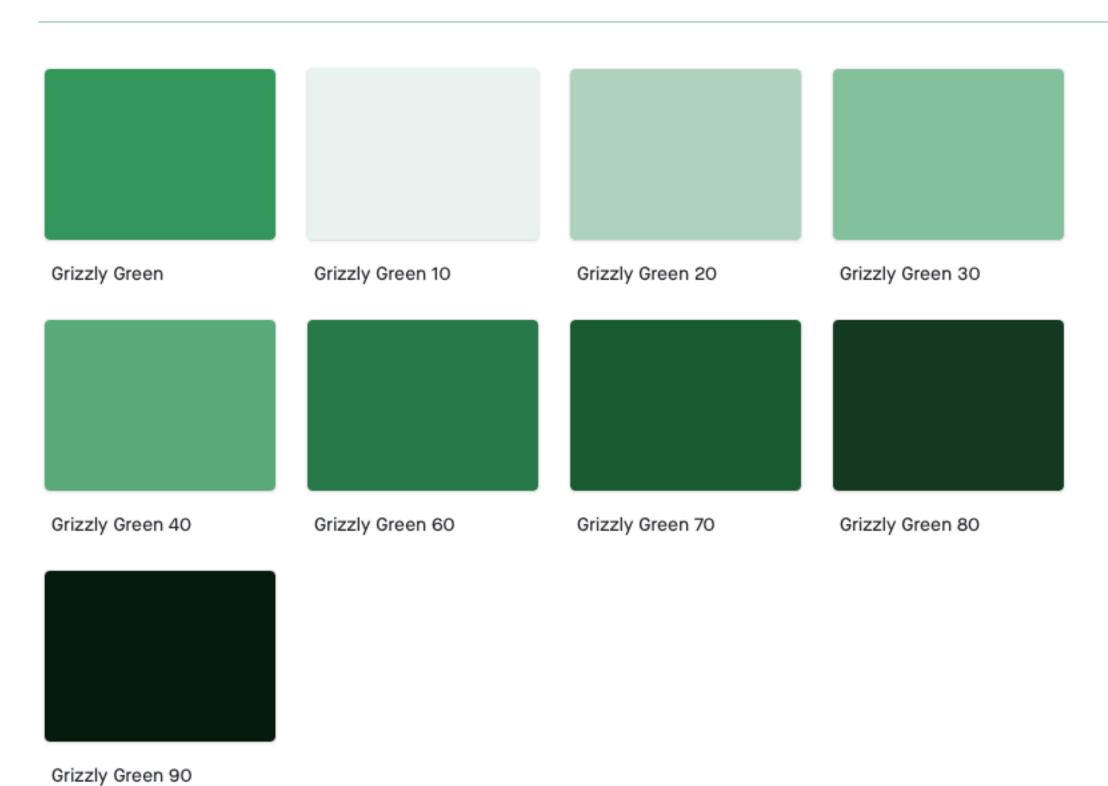

SUPPORT— AUTUMN AMBER

The primary support color style to indicate warning and pending states.

SUPPORT— GRIZZLY GREEN

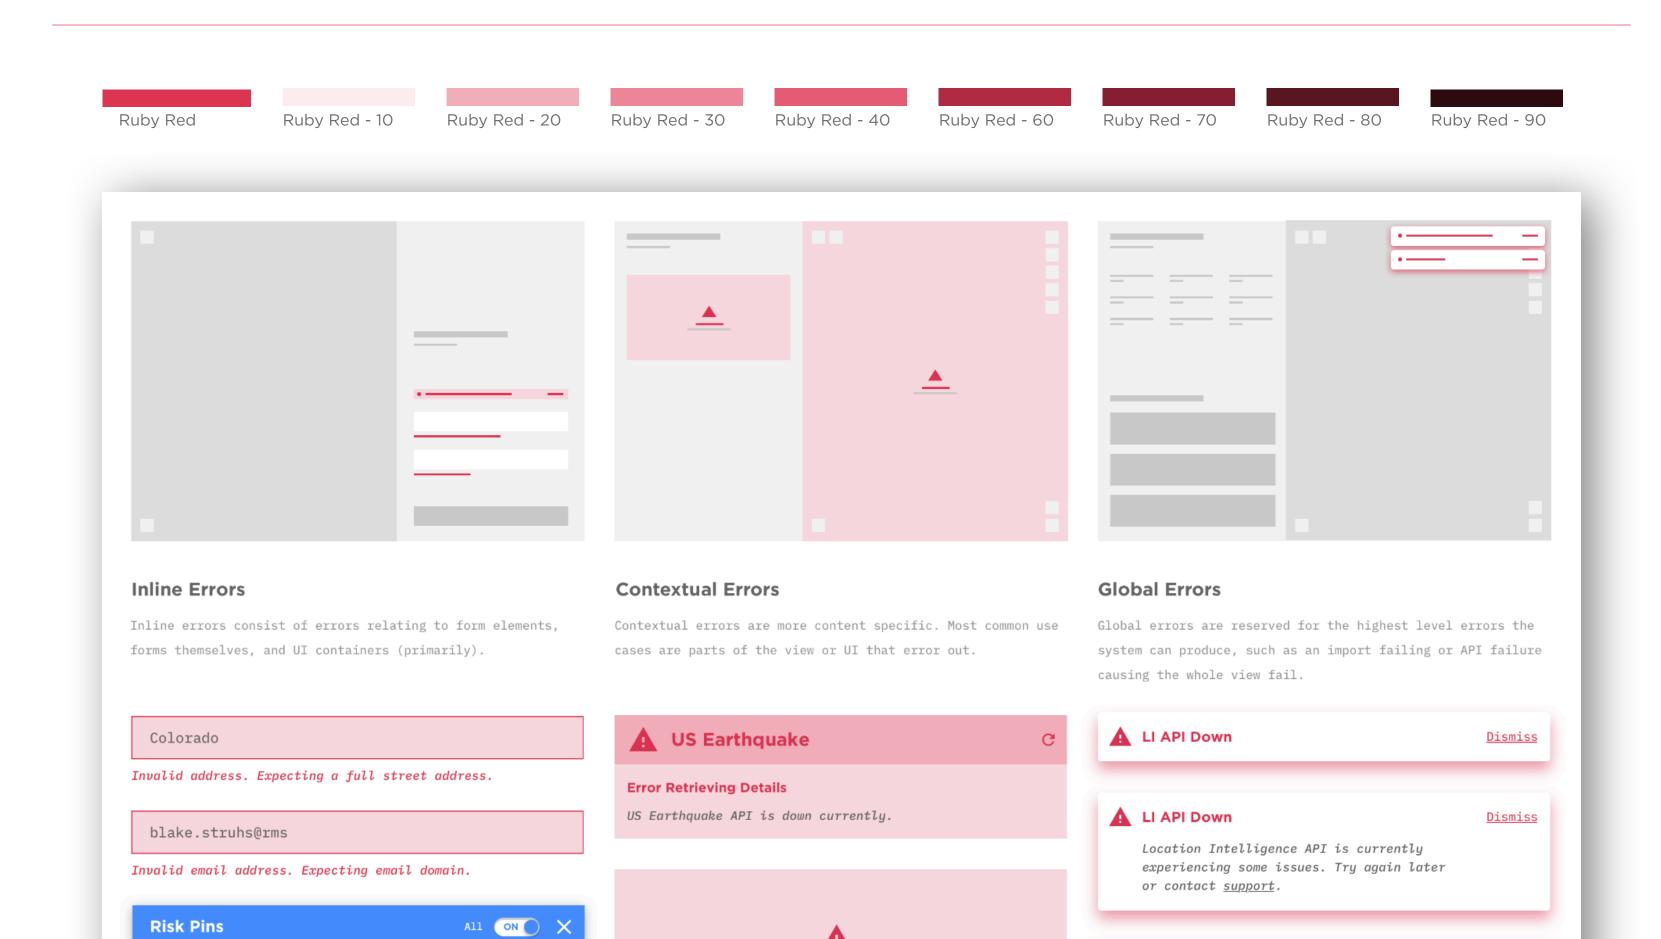

The primary support color style to indicate success.

•

SUPPORT— RUBY RED

The primary support color style to indicate errors.

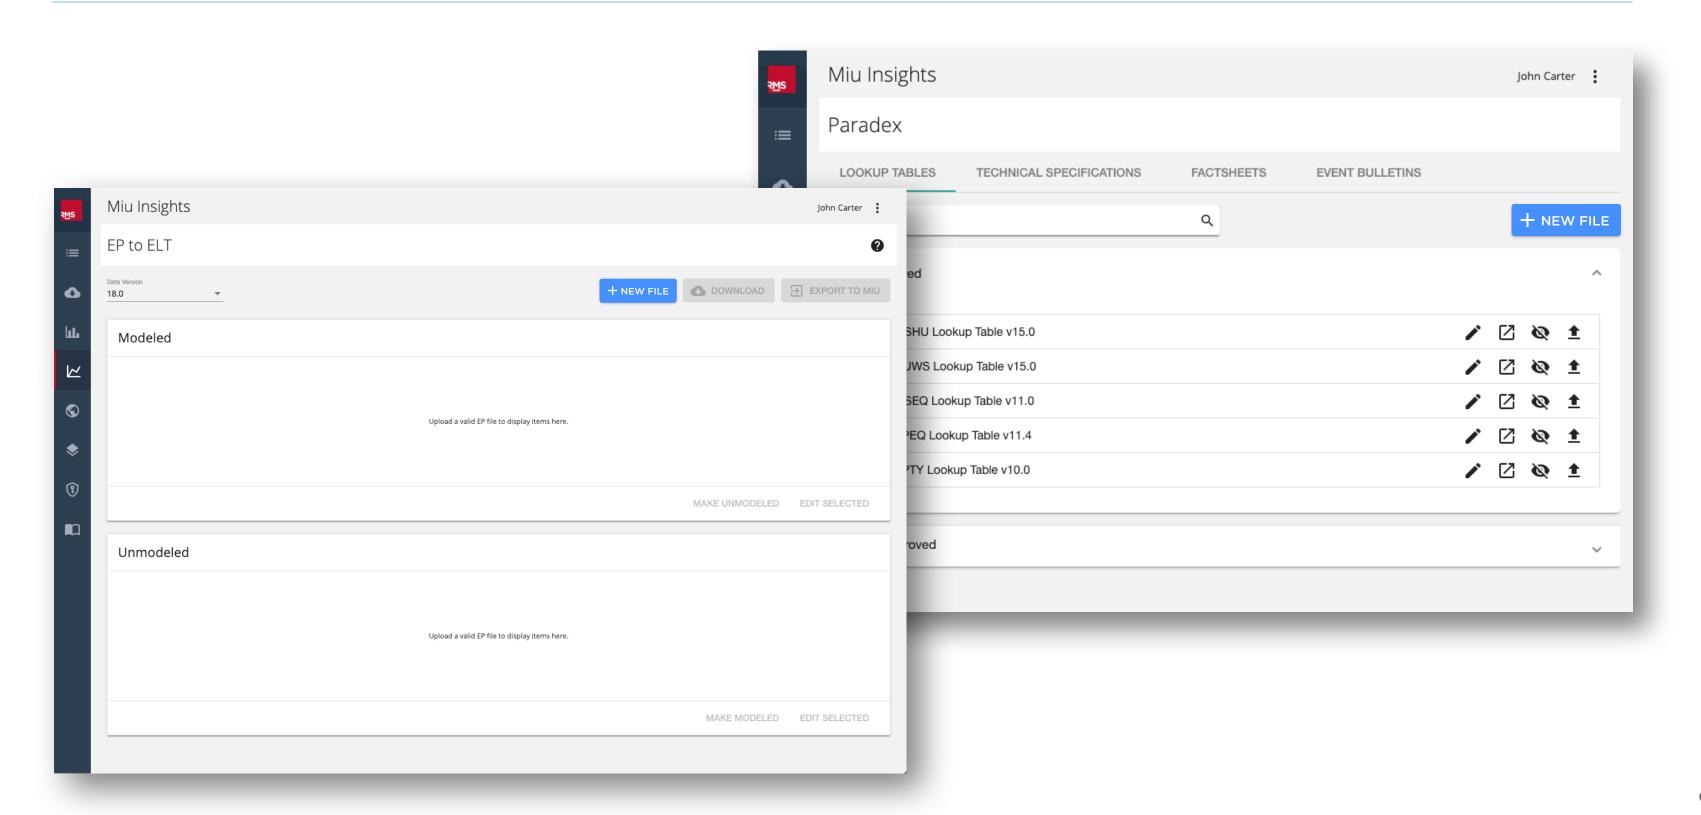

WHERE DO WE BEGIN?

PRIMARY ACTIONS— RMS BLUE

- All primary actions for Miu will use the primary brand blue.
- The RMS blue will only be used for these primary actions.

- Grayscale colors are mainly used for text.
- We're going to use the rules below for all Miu text style elements.

01. Display Large

Font Family: Gotham Font Weight: Bold Font Size: 48 px Line Height: 60 px

06. Subheading

Font Family: Gotham Font Weight: Bold Font Size: 16 px Line Height: 20 px

11. Caption

Font Family: IBM Plex Sans Font Weight: Medium Font Size: 12 px Line Height: 16 px

16. Label Italic

Font Family: IBM Plex Mono Font Weight: Medium Font Style: Italics Font Size: 10 px Line Height: 14 px

02. Display Regular

Font Family: Gotham Font Weight: Bold Font Size: 36 px Line Height: 48 px

07. Button

Font Family: Gotham
Font Weight: Bold
Font Size: 14 px
Line Height: 18 px
Character Spacing: 1 px

12. Caption Mono

Font Family: IBM Plex Mono Font Weight: Medium Font Size: 12 px Line Height: 16 px

17. Micro

Font Family: Gotham Font Weight: Bold Font Size: 9 px Line Height: 9 px

03. Display Mono

Font Family: IBM Plex Mono Font Weight: Text Font Size: 36 px Line Height: 48 px

08. Body

Font Family: IBM Plex Sans Font Weight: Medium Font Size: 14 px Line Height: 18 px

13. Link

Font Family: IBM Plex Mono Font Weight: Medium Font Size: 12 px Line Height: 16 px

04. Display Small

Font Family: Gotham Font Weight: Bold Font Size: 24 px Line Height: 36 px

09. Body Mono

Font Family: IBM Plex Mono Font Weight: Text Font Size: 14 px Line Height: 18 px

14. Label

Font Family: IBM Plex Sans Font Weight: Medium Font Size: 10 px Line Height: 14 px

05. Heading

Font Family: Gotham Font Weight: Bold Font Size: 18 px Line Height: 24 px

10. Caption Header

Font Family: Gotham Font Weight: Bold Font Size: 12 px Line Height: 16 px

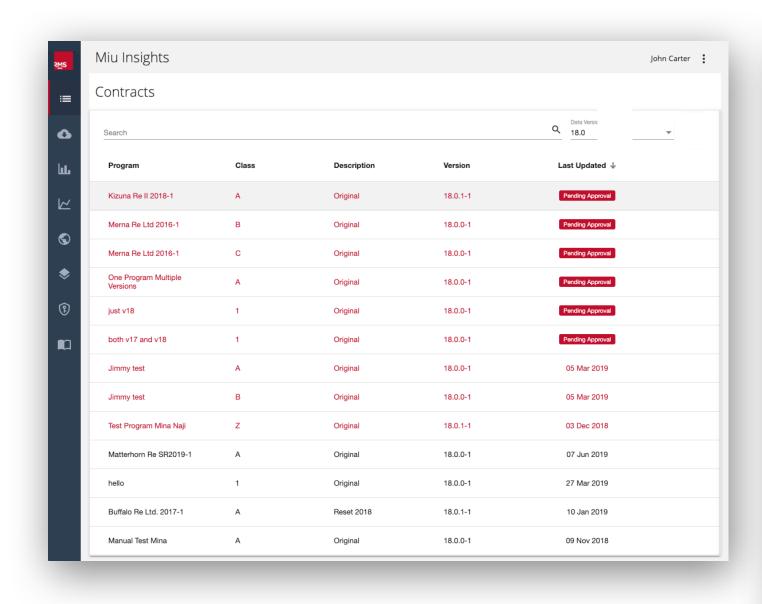

15. Label Mono

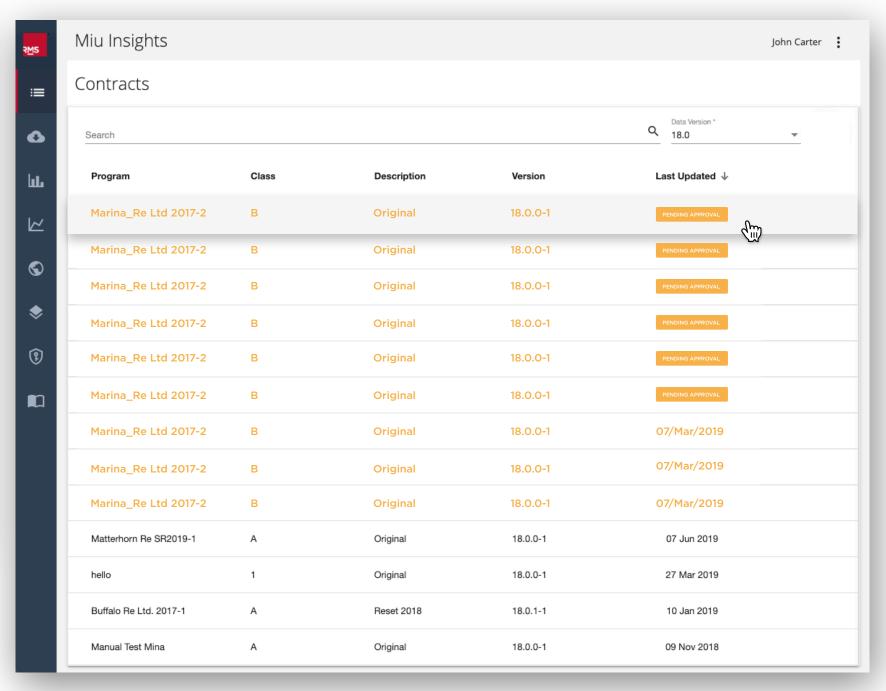

Font Family: IBM Plex Mono Font Weight: Medium Font Size: 10 px Line Height: 14 px

SUPPORT— AUTUMN AMBER

- Identified warning elements will now display Autumn Amber to indicate warning.
- This color will also be used for pending states within Miu.

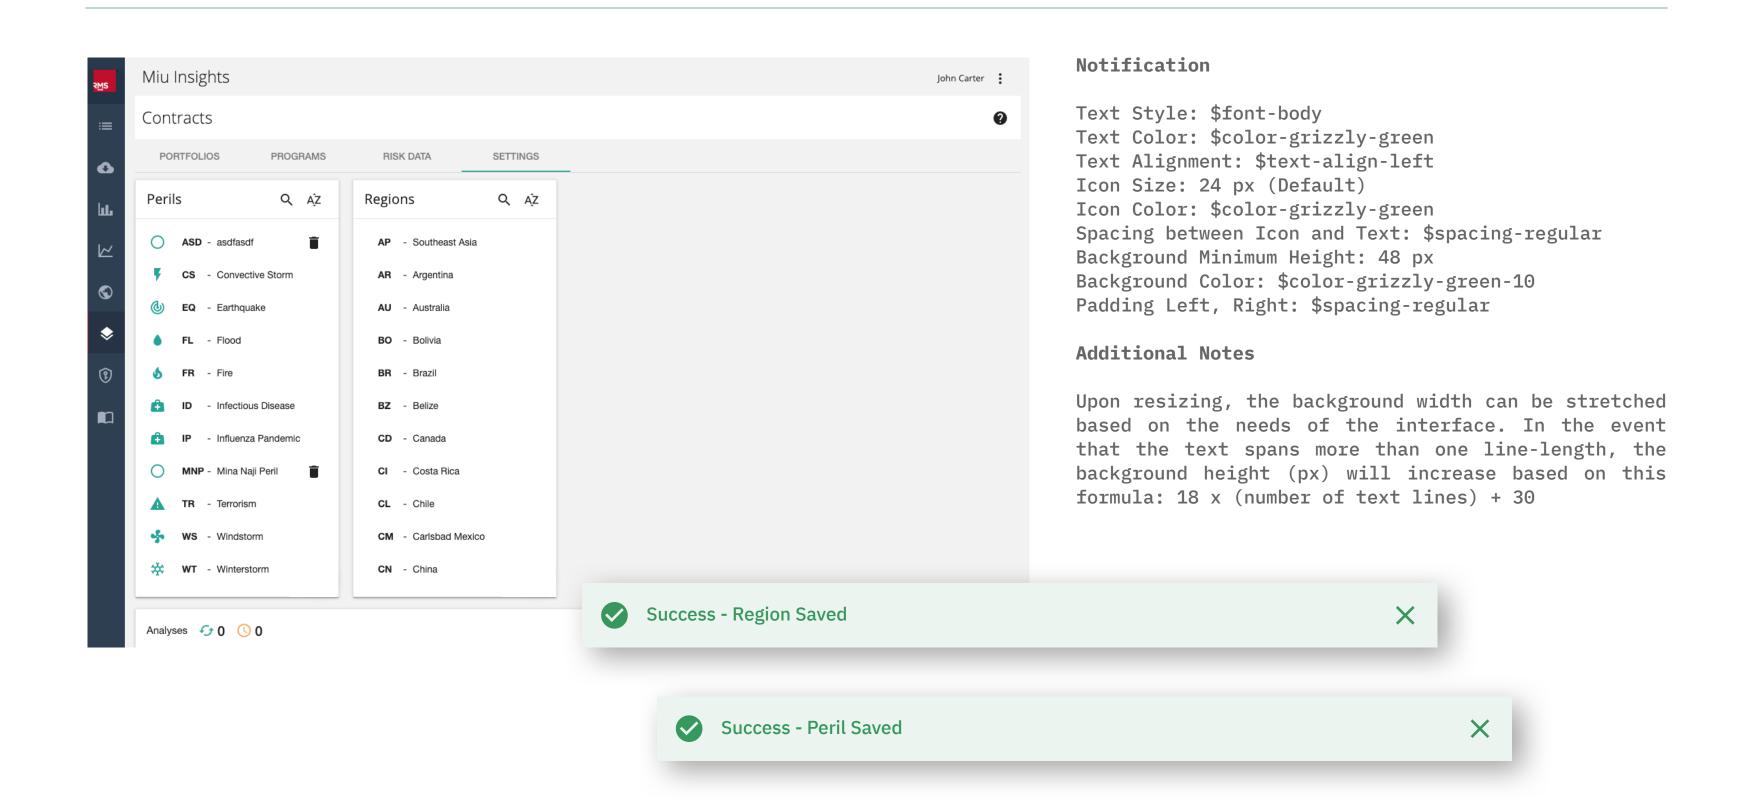

SUPPORT— GRIZZLY GREEN

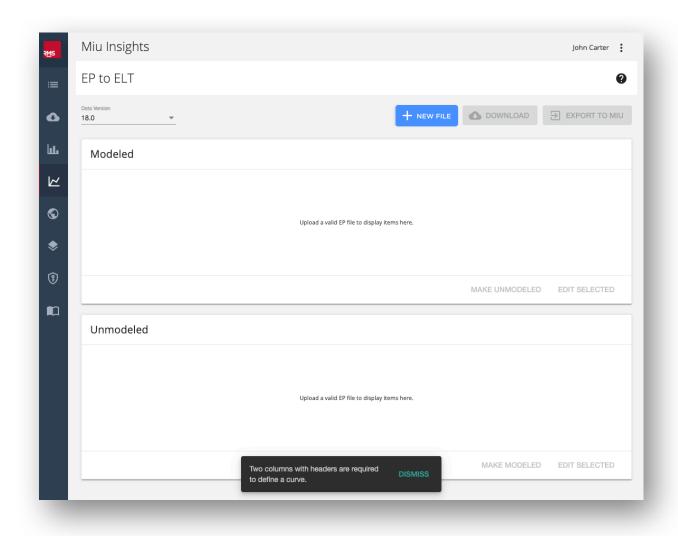

- Workflows requiring saving, exporting, deleting, or altering data.
- Specific to Miu: When a user saves a Region or Peril.

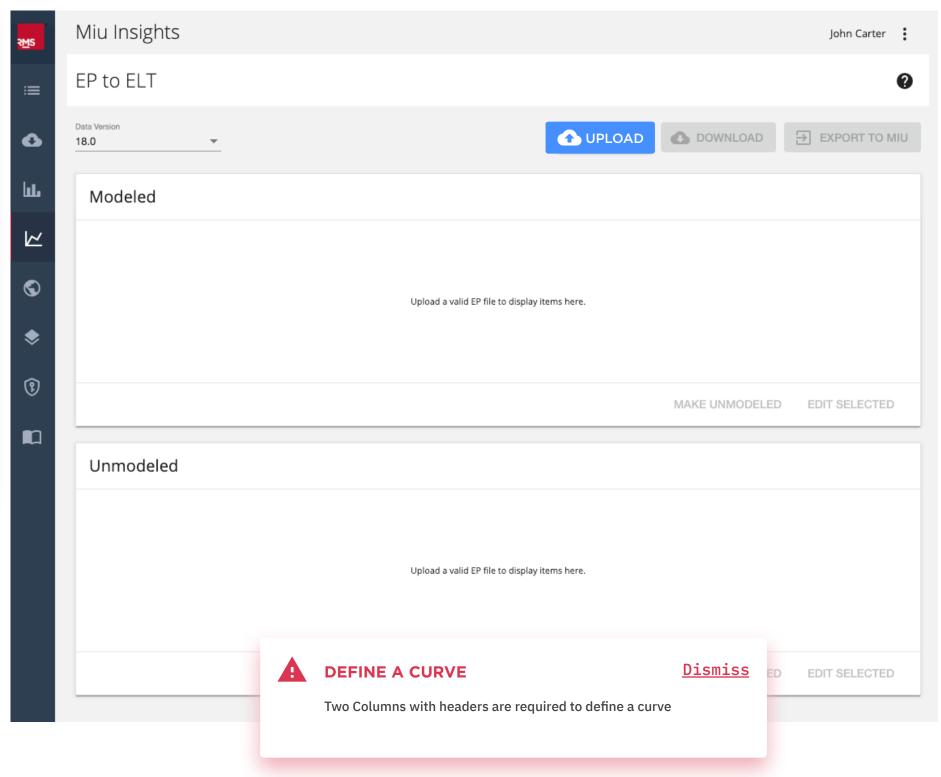

SUPPORT— RUBY RED

The primary support color style to indicate errors.

ICONOGRAPHY

Icons are everywhere; some are so powerful and universal that we instantly recognise that they represent a brand, product, or message, without the need for any words....On the other hand, when used incorrectly, icons can cause confusion, and completely affect the navigability for the user.

ICON GUIDELINES & RULES

- Lets move forward using the Material Icon guidelines.
- We will use icons & copy as signifiers for major workflows.

Icons on light backgrounds

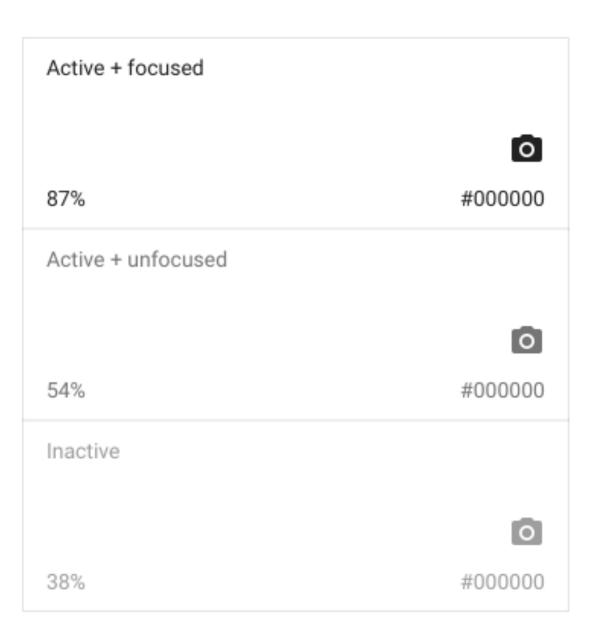

The standard opacity for an active icon with focused state on a light background is 87% (#000000). An active with unfocused state is 54%.

Active icon

The standard opacity for an active icon with focused state on a light background is 87% (#000000). An active with unfocused state is 54%.

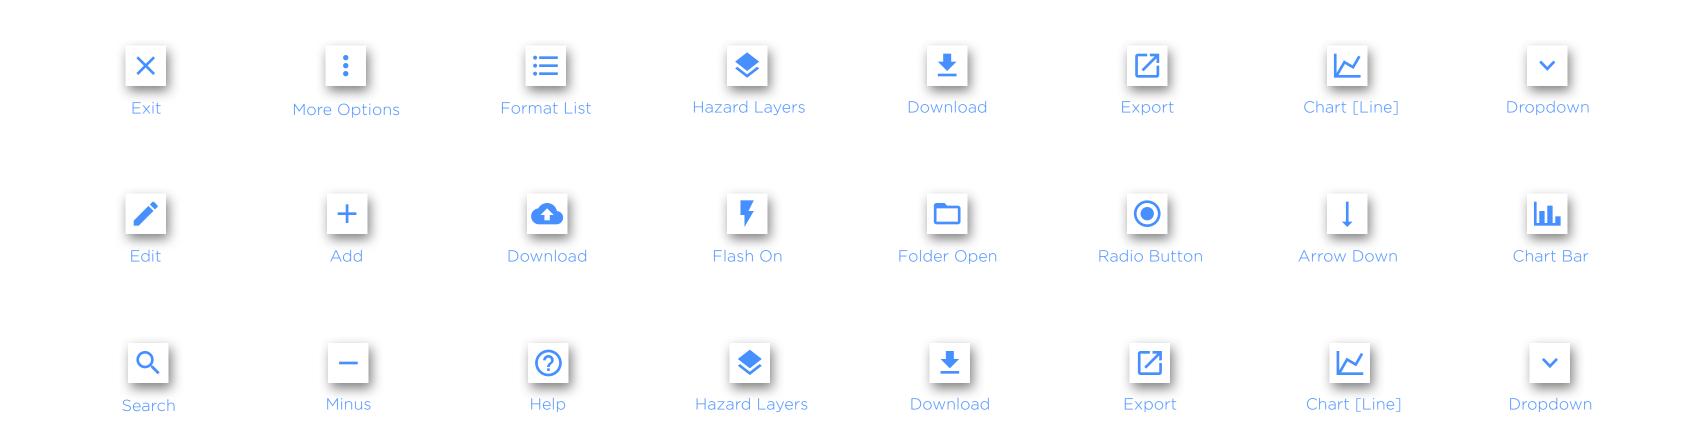

Inactive icon

An inactive icon, which is lower in the visual hierarchy, should have an opacity of 38% (\$000000).

IDENTIFIED ICONS

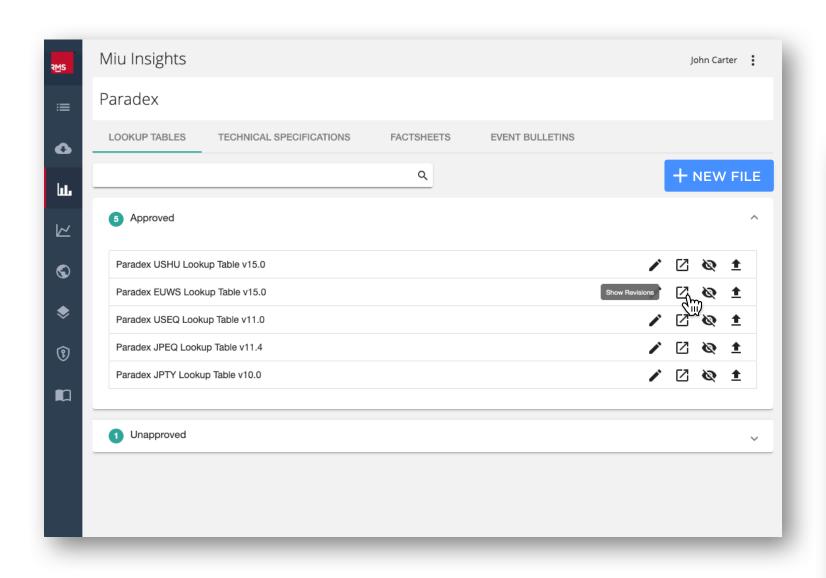

UNIDENTIFIED ICONS

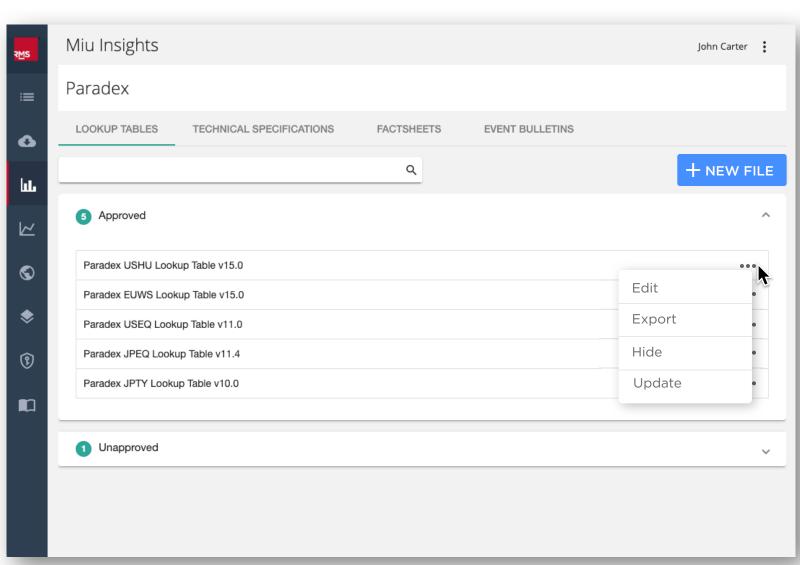

ICON INCONSISTENCIES & SOLUTIONS

- Global navigation icons will go away when we add new IQ menu navigation.
- We are going to concolidate the use of icons all together.
- The Message related to icons is not accurate

NAVIGATION ICONS [Current]

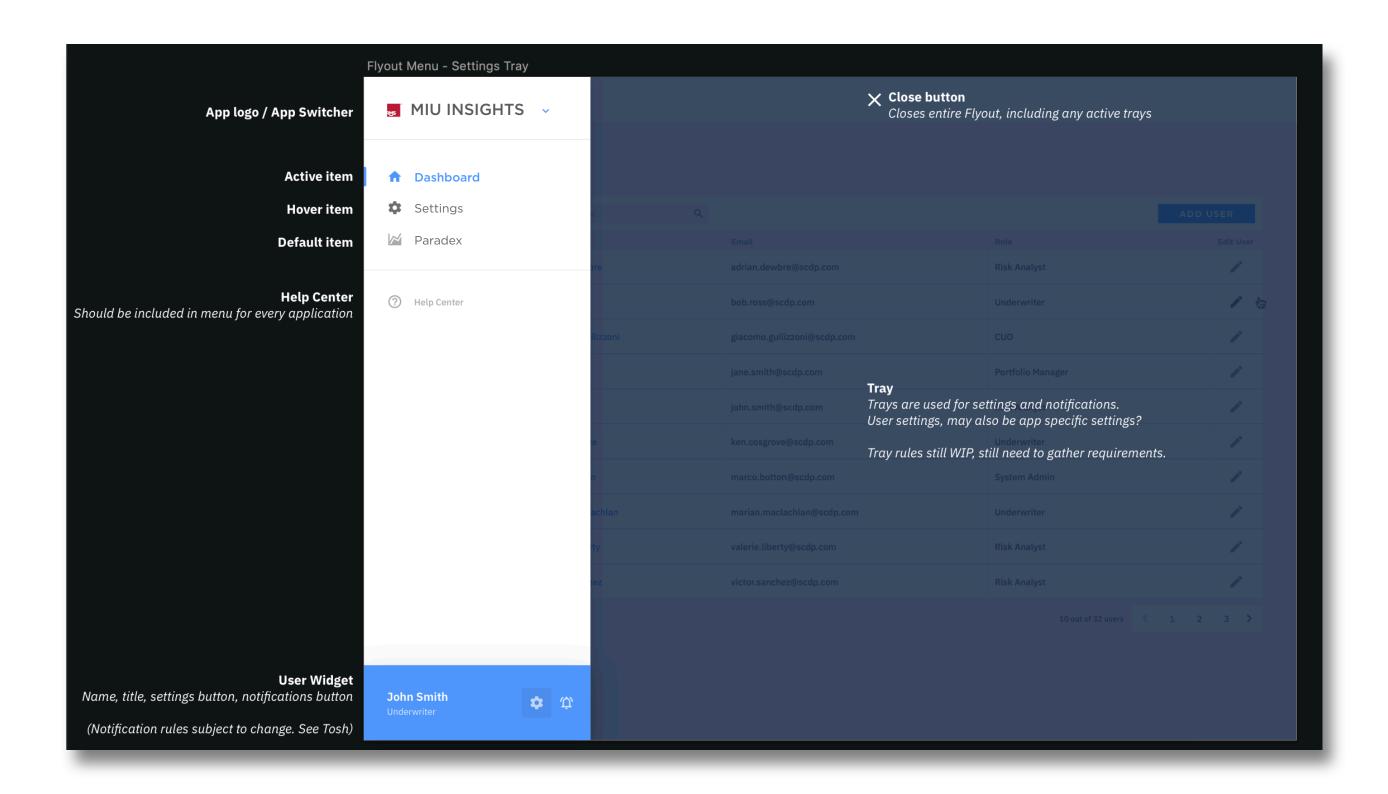

- Some of the global navagation icons do not correlate to the JTBD.
- If we use these elsewhere, they have to be relative to the users JTBD.

NAVIGATION — Whats Next?

- Our redesigned navigation will still use icons.
- Icons on the new menu will corrolate to the text copy.
- We will use copy to inform our clients where major workflows are located.

NEXT STEPS
